

Balasani Vishnuteja

balasanivishnuteja@gmail.com — +91 8688125767 — GitHub — LinkedIn

Summary

Information Technology undergraduate with experience building full-stack web applications and AI-based systems. Developed projects including a real-time SOC threat detection platform, an AI-powered MERN learning platform, and a terrain segmentation model using PyTorch. Strong foundation in backend development, APIs, and core computer science concepts.

Education

Anurag University	Aug 2024 – Present
B.Tech in Information Technology	CGPA: 8.33
Alphores Junior College	Jun 2022 – Apr 2024
Intermediate (MPC)	Percentage: 91.2
Kendriya Vidyalaya	Jun 2012 – Mar 2022
CBSE	Percentage: 81.4

Skills

Programming: Java, Python, C, JavaScript
Frameworks: React.js, Node.js, Express.js, Tailwind CSS, Framer Motion
ML/AI: PyTorch, Streamlit, Google Gemini API
Backend: REST APIs, WebSockets, JWT Authentication, bcrypt
Tools: Git, GitHub, VS Code, Linux Basics
Databases: MongoDB, MySQL
Core CS: Data Structures, OOP, DBMS, Operating Systems, Computer Networks
Languages: English, Hindi, Telugu

Projects

- MedSpecter — Runtime Anomaly Detection Framework** GitHub
- Designed and implemented a real-time SOC threat detection engine detecting **500+ anomaly events/session with 100ms latency across 7+ attack classes including Log4Shell**.
 - Built a **WebSocket-based monitoring pipeline** and developed a **3D Global Threat Map** visualizing attacks from **100+ IPs across 6 continents**.
 - Secured logs using **SHA-256 chained hashing** and integrated **Google Gemini AI** for automated threat explanation.
 - Tech: React.js, Node.js, Express.js, WebSockets, MySQL, Google Gemini AI, Tailwind CSS
- EduSkill — AI Powered MERN Learning Platform** GitHub
- Designed and implemented a **scalable MERN architecture** with JWT authentication, RBAC authorization, bcrypt hashing, and Helmet security supporting **three user roles**.
 - Integrated a **Google Gemini AI chatbot** and implemented a **real-time proctored exam system**.
 - Tech: React.js, Node.js, Express.js, MongoDB, Google Gemini AI, JWT, Tailwind CSS, Framer Motion
- Off-Road Terrain Segmentation using Machine Learning** GitHub
- Developed a semantic segmentation model using **PyTorch + Meta DINOv2** classifying **10 terrain types with 88% Pixel Accuracy and 0.76 Mean IoU**.
 - Built an interactive **Streamlit web application** enabling real-time terrain segmentation with automated metric tracking.
 - Tech: Python, PyTorch, Meta DINOv2, Streamlit, NumPy

Achievements

- HackerRank 5-Star in Java Programming.**
- Participated in **5+ hackathons**, building rapid prototypes and collaborative solutions.

Certifications

NPTEL — **Programming in Java (83%, Elite + Silver)** , Cyber Security — Cisco Networking Academy
HackerRank — Problem Solving (Intermediate), SQL (Basic) , Artificial Intelligence — Infosys Springboard

Activities & Leadership

- Executive Community Treasurer, IEEE** — Managed finances and coordinated student initiatives.
- Member, IEEE SSIT** — Society on Social Implications of Technology.
- Hosted and organized **technical events within IEEE**, coordinating teams and participants.
